HEVIK
TO SUIT YOU

JACKETS

Hevik not only offers high quality products that are carefully developed by specialized technicians but especially they are designed and crafted within our facility, ensuring complete control over every process, from design to quality to assembly. Our products are designed to offer you the best protection from unexpected falls and to take into account the different weather situations with particular care in avoiding heat exhaustion and dehydration.

Hevik guarantees quality and safety thanks to careful selection of high-tech and best quality fabrics. The materials chosen are not harmful to the skin and comply with the latest and strictest European regulations.

GLOVES

Although we always hope that it will never happen, it is important to consider that your hand in the unfortunate case of accident are generally the first part of the body which will suffer the unexpected impact.

Such a choice of the appropriate gloves is fundamental not only for the safety of your hand but of your entire body. Hevik as year of experience in finding the correct compromise which keep account of safety, ergonomability and comfort. All of the factors are used by our R&D department in developing suitable gloves catering for a diversity of use condition, weather and friendliness of use.

ARTICA COOLING VEST

ARTICA is the new cooling vest from HEVIK, that thanks to the innovative technological fabric Kewlfabric™ is designed for high and specific performances to help the rider when riding in extreme weather conditions in high temperatures, absorbing and slowly releasing the liquids in excess and activating a natural evaporative cooling process.

HEVIK ARTICA cooling vest is lightweight and designed to avoid any possible impediments to the natural riding positions. The stretch fabric parts guarantee excellent adherence to the body to obtain maximum technical performance.

HEVIK ARTICA cooling vest is the ideal complement to use together with the NASHIRA technical shirt to obtain an ideal riding condition while avoiding fatigue due to high temperatures.

NASHIRA TECHNICAL SHIRT

The TECHNICAL LAYER underwear is made of Dryarn® specifically designed for the motorcycle rider, however its features make it suitable for any use in multi-sport outdoor activities. The 3D seamless technology allows the clothing to be non-deformable and to adapt to the body shape guaranteeing freedom of movement and ideal muscular compression. Thanks to the Dryarn® high degree of insulation and breathability, the TECHNICAL LAYER underwear can maintain the body temperature constant and at the same time transfer the skin perspiration to the outer layer of the fabric, for fast evaporation, without excessive cooling in presence of low temperatures or high ventilation.

DRY BAG BACKPACK

Hevik has designed and built its products to withstand the most extreme climatic conditions. This is because having a waterproof dry bag allows us to protect our phones, wallets, and other personal items from the rain.

The HEVIK dry bag is easy to use. Insert your items, roll up the top, and here is a waterproof backpack. Frontally, it has a pocket with a waterproof zip to insert small objects that are easy to extract. The contact part of the back has a very comfortable system with breathable cushions that allows the wearer to wear it comfortably.

PROTECTORS KITS

The protections are a fundamental element for your safety while driving. Designed and manufactured with advanced technologies that make them lightweight and extremely efficient in shock absorption, HEVIK protection kits are an accessory for your jacket or trousers that should never be missing.

DESCRIPTION:

- Is the new cooling vest from HEVIK, that thanks to the innovative technological fabric Kewlfabric™ is designed for high and specific performances to help the rider when riding in extreme weather conditions in high temperatures, absorbing and slowly releasing the liquids in excess and activating a natural evaporative cooling process.
- HEVIK ARTICA cooling vest is lightweight and designed to avoid any possible impediments to the natural riding positions. The stretch fabric parts guarantee excellent adherence to the body to obtain maximum technical performance.
- HEVIK ARTICA cooling vest is the ideal complement to use together with the NASHIRA technical shirt to obtain an ideal riding condition while avoiding fatigue due to high temperatures.

FIRST USE:

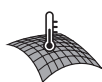

- Immerse the product under water, gently squeeze out excess water and allow the product to dry completely.
- This allows the fabric fibers to activate and create the conditions to start the absorption and cooling process during use.

MATERIALS & FEATURES

- Outer Shell: 60% polyester, 25% nylon, 15% elastane
- Lining: PU nylon 100%
- Insulation: HyperKewl Polymer Embedded super absorption cooling fabric

Internal protection HIPS

EASYFLEX hip protection, lightweight, ultraflexible and oversized.
The perception of the existence of the protection is limited to the maximum in terms of thickness and weight.
Kit is made from 2 pieces

► H-FULL BACK ARMOR PROTECTOR

Multilayer back protector allowing optimal shock absorption without compromising comfort, ventilation and flexibility.
In case of a fall or a collision, the MEMORY FOAM layers flow individually, distributing the shock and limiting the transmitted energy to the spine and to the general area of the back. Designed to be positioned inside the back pocket of any Hevik jacket made for either men or women, is available in three sizes, with a length from 44cm to 52cm . CE approved, type of protection CB (central back protection)-certified according to EN1621-2:2014 standard, level 2 (the more protective).
