SIZE GUIDE, PICTOGRAMS, PRODUCT LIST 212

A close-up, high-contrast photograph of a red motorcycle seat. The seat is made of a material with a fine, regular grid of small holes, resembling perforated leather. The lighting is dramatic, with deep shadows and bright highlights that emphasize the texture and contours of the seat. The background is dark, making the red seat the central focus.

# INNOVATION & TECHNOLOGY

## ASIAN FIT

IXON is a brand of motorcycling equipment created by and for motorcyclists. The company was founded in 1996 in France by Thierry Maniguet, a big fan of motorcycling. Today it is an international brand distributed in over 70 countries. But it has stayed close to its roots. Thierry Maniguet is still at the head of IXON, and our headquarters are still in France, in Mâcon.

Our dynamism comes from our **“Think Global, Act Local”** approach: we offer the same level of excellence worldwide, while adapting our work methods and our offer to the specific needs of users in various countries.

**On our garments from Asia collection, all the measurements (length and width of the body, length and thickness of the limbs, etc.) and the position of each protector have been rethought to adapt to Asian morphologies.**

**Our objective is clear: to offer motorbike equipment that is truly adapted to our users in Asian countries.**

## ASIA-SPECIFIC FEATURES

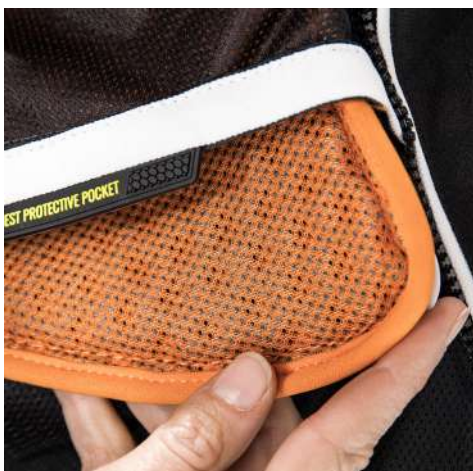

**IXON equipment from the Asia Collection offers comfort, performance and functionality adapted to the riding environments of Asian countries.**

In order to offer users of IXON products the best possible riding experience, we have developed a number of features specific to Asia.

### CP<sup>2</sup> CONCEPT: CHEST PROTECTIVE PLUG

This is a concept developed by IXON. When featuring the CP<sup>2</sup> CONCEPT, jackets are equipped with press studs and velcros on the inside of the chest to allow the attachment of chest protectors from other manufacturers.

### CHEST PROTECTIVE POCKETS

For added safety, the jackets are equipped with chest protective pockets: these pockets can accommodate IXON ARMOR CHEST protectors and Fanom<sup>®</sup> CHESTB\_2 protectors.

### WATERPROOF POCKET

This is a very practical feature: many jackets include a waterproof pocket to protect your wallet or fragile objects. With this 100% waterproof pocket, you can ride with complete peace of mind!

### ZIPPER TO CONNECT OPTIONAL WARM LINER (THERMAL LINER A)

To improve thermal comfort, some jackets are equipped with a zipper that allows you to connect an additional warm layer: THERMAL LINER A, available separately.

## IX-PROSOFT

The new, ultra-flexible protection developed by IXON offers excellent comfort. Once inside the jacket, the IX-PROSOFT is completely invisible: you don't feel it, it doesn't restrict your movements.

Thanks to its construction, this new protection is highly ventilated. This protection is also very light: the IX-PROSOFT is 30% lighter than the IX-PROFLEX.

**IX-PROSOFT SEKA\_1**

**CE certified shoulder/elbow/knee protection**  
**Type A, level 1, T+, T-, compliant with the EN 1621-1:2012 standard**

## IX-PROFLEX

## **IX-PROFLEX** SEKA-1

Developed by IXON, the IX-PROFLEX features bevelled hexagons with a unique design to provide flexibility, ventilation and resistance to impacts.

The complex structure, combined with a choice of flexible, but highly resistant materials, goes to make an injected, pre-formed protection that is very user-friendly, with a level of thickness making it very comfortable and discreet to wear.

**IX-PROFLEX SEKA-1**

**CE certified shoulder/elbow/knee protection**  
**Type A, level 1, T-, compliant with the EN 1621-1:2012 standard**

# Fanom®

## MAXIMUM PROTECTION AND COMFORT

The fanom® technology has revolutionised protection thanks to a **smart-design injected structure** providing **maximum comfort to the rider**:

- **ULTRA FLEXIBLE**: the structure stretches in both directions, improving product flexibility and stretchability. fanom® protections are suited to all body types and guarantee total freedom of movements.
- **ULTRA LIGHT AND ULTRA THIN**: the structure offers fanom® protections, which are near invisible under motorcycle clothing and are so comfortable you won't feel them during the ride.
- **ULTRA VENTILATED**: as their structure is built using open cells, fanom® protections provide maximum ventilation.

## WE PROVIDE A RANGE OF FANOM® PROTECTIONS FOR ALL YOUR NEEDS:

**FANOM SEK TYPEA**  
**FANOM SEKA\_2**  
**FANOM SEKB\_2**  
Shoulder-elbow-knee  
protection

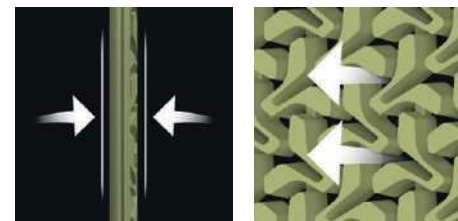

**FANOM HIP TYPEB**  
Hip protection

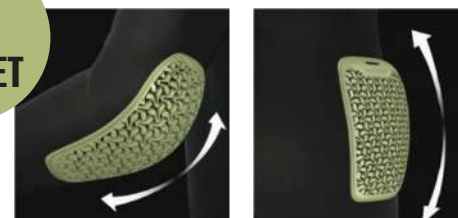

**FANOM CHESTB\_2**  
Chest protection

**FANOM BFB\_2**  
Back protection

**FIT  
&  
FORGET**

Within the IXON collection, the range of Fanom® protections includes 6 products:

Area to protect	Product	Certification level	Type of protection
Shoulder, elbow, knee	FANOM SEK TYPEA	Level 1	Type A
	FANOM SEKA_2	Level 2	Type A
	FANOM SEKB_2	Level 2	Type B
Hips	FANOM HIP TYPEB	Level 1	Type B
Chest	FANOM CHESTB_2	Level 2	Type B
Back	FANOM BFB_2	Level 2	Type B

**The protection pockets in IXON garments are designed to accommodate fanom® protectors.**

**fanom® protectors are 100% washable and recyclable.**

Types of protection:

- Type A = the protection covers a standard body area
- Type B = the protection covers a larger body area

BETAC® SHOULDER PROTECTOR

BETAC® ELBOW PROTECTOR

BETAC® KNEE PROTECTOR

## MATERIALS

- Thick and supple cow leather

## FEATURES

- Micro perforated leather
- Localized micro perforations to avoid weakening the leather on stitching areas
- Secured stitching
- High abrasion resistance synthetic fabric reinforcements on exposed areas: forearms and knees
- 2-layers of leather on buttocks and foam reinforcements on coccyx area
- Multi-material reinforcement (double layer of leather and 3D Air Spacer Mesh) for safety and better air flow (chest, biceps, triceps, shoulder, thighs)
- Pockets for protectors in 3D Air Spacer Mesh for better air flow
- Highly ventilated aerodynamic hump with air extractors and equipped to welcome a water bladder
- Compatible with IX-AIRBAG UO3 vest
- Removable Mesh lining
- 2 internal pockets

## FIT & COMFORT

- Fit: Fitted
- MotoGP inspired dual-density sleek shells on shoulders and knees
- Flex leather on sides, on back of armholes and on bottom back
- Stretch inside sleeves and on all the leg length, from crotch to calves
- Grip inside knees
- Removable and adjustable elbow sliders
- Knee sliders included, adjustable and replaceable
- Thumb loop straps (which prevent the sleeve from coming up in case of a fall)
- Great combination with our underlays: UNDERGROUND (page 146), UNDERGROUND TOP (page 147) and UNDERGROUND PT (page 147)

## SAFETY

- Shoulder/elbow protectors: BETAC® Level 1
- Knee protectors: BETAC® Level 1
- Hip protectors: BETAC® Level 2

VENTILATED STREET FIGHTER  
LEATHER JACKET

1015 : BLACK/WHITE

IX-PROFLEX SEKA-1

IX-SOFT CHEST

## MATERIALS

- Outer shell: Thick and supple cow leather
- Insulation: Zipper to connect the optional THERMAL LINER A (page 144)

## FEATURES

- Ventilation: micro-perforations in the leather (so that leather is not weaker near the seams)
- Collar: racing collar with neoprene brace and tab to fasten
- Fastening: semi-autolock zippers at the wrists, tightening straps at the bottom of the jacket
- Pockets: 2 outside pockets, 3 inside pockets with one waterproof wallet pocket
- Reflective panels on biceps and rear belt, connection to trousers (zip around the waist and loop at the back)

## FIT & COMFORT

- Fit : Regular
- Comfort: 4-direction stretch fabric inside sleeves, at armholes and on sides

## SAFETY

- Shoulder/elbow protectors: IX-PROFLEX SEKA-1
- Chest protectors: IX-SOFT CHEST
- Back protector pocket (back protector available as an option)
- Equipped with CP<sup>2</sup> CONCEPT (Chest Protective Plug)

## GLOVES RANGE HIGHLIGHTS

Many new models in several universes and in all price ranges!

### RACING

#### THUND and THUND L

Gloves for men and women with an excellent quality/price ratio, offering a very good level of protection thanks to the leather and amara material reinforcements, as well as optimal comfort thanks to the large stretch mesh area on the wrist.

### ROADSTER

#### MIRAGE AIR

Compact glove with a well thought-out mix of leather and textile materials. With its lines, the superb design of its protective shell and the injected air inlets in the fingers, the MIRAGE AIR has an aggressive look!

## ROADSTER

**MIRAGE AIRFLOW and MIRAGE AIRFLOW L**

The best of the MIRAGE AIR in terms of design and look, but with even more ventilation to cope with the summer thanks to the choice of mesh on the back and perforated leather on the palm.

**MIG 2 AIRFLOW and MIG 2 AIRFLOW L**

Highly ventilated versions of the very comfortable MIG 2 and MIG 2 L, these gloves will be perfect for hot weather thanks to the choice of breathable materials on the back (Q-Spandex + mesh).

## URBAN

**MIG 2 LEATHER**

For commuters, the MIG 2 is also available in a very stylish version with 100% leather on the back and palm, while offering the comfort of a neoprene cuff.

# ALL-SEASON PRODUCTS

## MODULAR CONCEPT

DO YOU WANT TO WEAR THE SAME JACKET EVEN WHEN THE TEMPERATURE DROPS? THEN THE MODULAR CONCEPT IS PERFECT FOR YOU. THANKS TO THIS INNOVATION, WE OFFER A LINE OF VERSATILE PRODUCTS THAT YOU CAN ADAPT TO THE CONDITIONS FOR A GREATER RIDING EXPERIENCE!

### WHAT IS THE MODULAR CONCEPT?

The products featuring the MODULAR CONCEPT have a connection system that allows an optional thermal liner to be added quickly and easily to the inside of the product. By equipping your product with an optional thermal liner, improve its warmth performance and enjoy the cold or chilly riding sessions like never before! Our optional thermal liners are quality products made from materials carefully selected for their technical performance and comfort. Another product benefit: these liners have a sober look and can be worn separately. So once you get off your bike, you can wear them as casual jackets!

## MODULAR CONCEPT: THE JACKETS

These products are easily recognisable in our collection: for all products belonging to the MODULAR CONCEPT series, the product names start with "M-".

## MODULAR CONCEPT: THE OPTIONAL THERMAL LINERS

Two optional thermal liners are available to equip your jackets from the MODULAR CONCEPT series:

M-THERMAWIND A

Windproof and water repellent jacket, made in softshell and stretch material to provide you with the best level of comfort.

M-THERMALOFT A

Down jacket that is both compact & warm, and comfortable enough not to restrict movement.

## FOOTWEAR RANGE HIGHLIGHTS

**New looks and new technologies to offer - right down to the feet - functional and comfortable equipment, ultra adapted to the needs of motorcyclists!**

Our development efforts allow us, for this collection, to offer new models in 4 different ranges: Roadster, Adventure, Urban, Heritage.

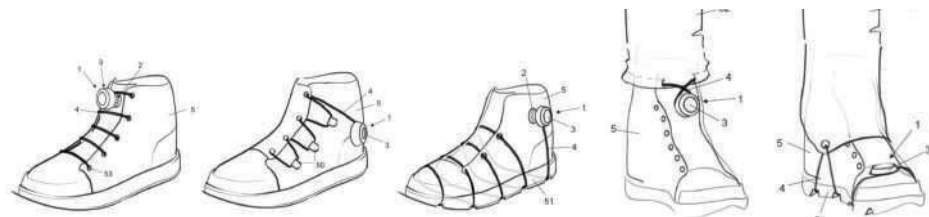

The **BULL 2 WP** and **BULL 2 WP LADY** represent a new generation of high-end roadster shoes after the best-selling **BULL WP** and **BULL WP LADY**. While keeping what made the success of the first generation (strong look, fitting, Michelin sole), these new models show a new level of technicality and inaugurate in particular a very practical FIDLOCK system of adjustment and closing.

For lovers of the great outdoors, the Adventure range offers two new boot models. The **KLAY WP** boot is suitable for all terrains and meets the most extreme challenges, the **MIDGARD WP** boot is more touring oriented and is the perfect choice for long road trips!

When protection meets style, the new **KRAFTER WP** boot is a perfect example of the added value of our Heritage range. This vintage looking boot provides all the comfort of a modern boot while being waterproof and offering an excellent level of protection.

# FIDLOCK®

The new **BULL 2 WP** and **BULL 2 WP LADY** shoes introduce a new, highly efficient tightening and fastening system to our collection, the **FIDLOCK® Winch** system.

It is a patented system that is both rotating and magnetic. Simply turn the knob to tighten the shoe and the magnet automatically closes the system. To open the system, simply pull. The FIDLOCK® Winch system is quick and easy to use for a biker and can be operated with **one hand!**

**OrthoLite®**  
comfort foam insoles

OrthoLite®, which was launched in 1997, is the leading manufacturer and supplier of **open-cell foam inner sole technologies** for the largest footwear brands worldwide.

OrthoLite® partners with over 400 major brands and manufactures some 500 million pairs of soles every year for these brands' footwear.

Major running shoe brands such as Adidas, Asics, Mizuno and Salomon have chosen the OrthoLite® technology in the last few years.

As part of its continuous innovation process, IXON has decided to integrate this technology into its motorbike shoes. OrthoLite® insoles can be found in our Adventure, Urban and Heritage ranges in the following products: **KLAY WP, MIDGARD WP, GHOST WP, GHOST WP LADY, FREAKY WP, FREAKY WP LADY, KRAFTER WP.**

## BENEFITS

OrthoLite® soles are made of open-cell polyurethane foam. The alveolar sole drains off humidity more easily, has a greater resistance to impacts and wears less quickly than traditional soles. The composition is also more lightweight, more breathable and provides greater odour control.

## ENVIRONMENTAL APPROACH

All OrthoLite® open-cell foams contain 5% recycled rubber from the production of outer soles. This is where the notable black spots seen on all OrthoLite® foams come from. This exclusive technology adds resilience, breathability, shock absorption and comfort to the soles, and furthermore, it prevents over 300 tonnes of recycled rubber from ending up in tips every year.

# SIZE GUIDE PICTOGRAMS PRODUCT LIST

IXON

# SIZE GUIDE

## MEASUREMENTS

To see which size will suit you, take the measurements shown below.

### A HEIGHT

Stand up with your legs straight and measure your height.

### B CHEST SIZE

Place your tape measure around the widest part of your chest and breathe normally.

### C WAIST SIZE

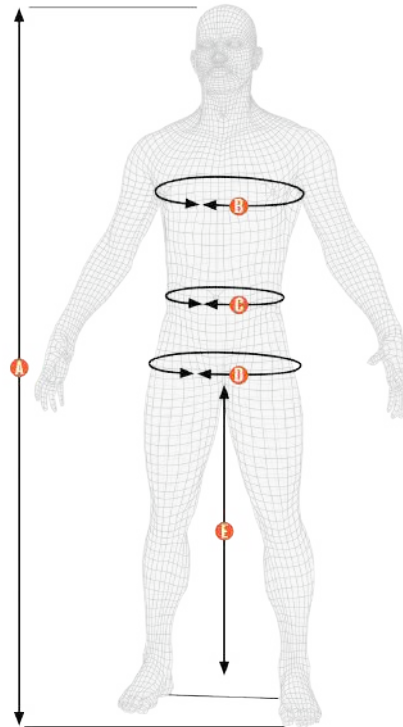

Place your tape measure just below your bottom ribs around your stomach.

### D HIP SIZE

Place your tape measure around the widest part of your hips and buttocks.

### E CROTCH TO ANKLE

Stand up with your legs straight and measure from the crotch to the ankle.

## CHOOSE YOUR SIZE

Compare your measurements to the charts. If your measurements produce different sizes, choose the next size up to cover all measurements.

Example for a men's jacket:

B = 98cm: L

C = 88cm: XL

D = 94cm: L

So XL is the right choice

## JACKETS

MEN
