

LS2

**HELMETS
& APPAREL**
COLLECTION 2024–2025

**ALWAYS
AHEAD**

HISTORY

The LS2 brand was born in 2007 with a clear purpose: to become the world market leader in the motorcycle helmet industry. More than 30 years of experience from its parent company, MHR, has contributed to its rapid growth.

LS2 covers all needs of two-wheel lovers from “head to toe”: helmets, jackets, pants, gloves, boots, and goggles.

Distributed in more than 125 countries and being the market leader in many of them, LS2 is undoubtedly the fastest-growing brand in its industry, demonstrating the love and trust of motorcycle consumers.

BRAND PILLARS

01 SAFETY

Protecting your dreams! Safety is our number one priority; we are committed to offer maximum protection to all our riders.

02 QUALITY

We only use high quality materials! Our products meet or exceed the most demanding test standards required internationally.

03 INNOVATION

LS2 constantly invest in R&D and we are continuously searching for modern technology to incorporate into all our products.

04 DESIGN

Style and design! We are highly creative in terms of graphics and product design without compromising on quality and safety.

05 PASSION FOR RACING

We love motorsport! LS2 is a proud sponsor of several riders in different categories (moto2, moto3, SuperBike, Dakar and many more).

MATERIALS

CARBON

(MICRO WEAVE CARBON)

Carbon Fibre is a material used extensively in the aeronautical industry and of course in the highly competitive world of Formula 1 and MotoGP. It has incredible strength but it's extremely light.

LS2 uses multiple layers of our exclusive wide-weave carbon fibre for a very light, but strong shell that offers state-of-the-art energy management for the utmost on safety.

6K CARBON FIBER

With a minimum 6000 carbon fiber weave, LS2 sets the pace for high performance Carbon Fiber motorcycle helmets beyond the capabilities of any other helmet manufacturer in the market.

9K CARBON FIBER

Champions need championship-level equipment. Our top racing helmets, the FIM approved THUNDER GP PRO & X-FORCE PRO are ultra-light with enhanced shock absorption attributed to the high-performance 9000 Carbon Fiber weave.

HPFC

(HIGH PERFORMANCE FIBREGLASS COMPOSITE)

High Performance Fibreglass Composite is a carefully layered, proprietary blend of a unique weave of fibres pre-filled with resin into a strong, ultra lightweight, but rigid shell that bears an impact while better dispersing and managing energy for a safer ride.

KPA

(KINETIC POLYMER ALLOY)

A proprietary material specifically formulated by LS2, KPA utilizes nanoparticle technology to blend space age thermoplastics along with microscopic levels of aramid fibres for a material that is strong, lightweight, and offers the latest in high performance energy management for a safer ride. This special formula meets both ECE 22.06 and DOT requirements.

HPTT

(HIGH PRESSURE THERMOPLASTIC TECHNOLOGY)

LS2 developed HPTT as the perfect blend of ABS and other thermoplastic polymers to offer the ultimate balance between safety, energy managing performance, weight, and value.

X-STATIC® fabric is bonded with 99.9% pure silver to the surface of Nylon 6.6, meaning that no nanotechnology chemicals are used to create permanent antibacterial, odor control, thermal regulation, and anti-static electricity functions. These functions will not fade after many washes and will last for the product's entire lifespan. X-STATIC® has been proven to effectively inhibit bacteria and mold, thus helping to reduce unpleasant odors.

Coolmax® fabric helps evaporate moisture and promotes breathability. It is made of a special fiber, composed of four to six channels that create a transport system capable of moving moisture from the skin to the outer layer of the fabric. This system dries moisture faster and more effectively, while simultaneously regulating body temperature through evaporative cooling.

OUR RIDERS

FERMIN ALDEGUER MOTO 2

LS2 INTERCOM

POWERED BY

LS2 4X is a bluetooth communication system co-developed with CARDO tailored specially for LS2's helmets.

This special model provides optimal bluetooth environment with intuitive operation and easy installation of the unit.

When riding you can listen to your music, GPS guide and make phone calls through bluetooth connection.

Intercom communication range is up to 1200m based on one-to-one connection.

PINLOCK 70
MaxVision™ | Included

FEATURES

- Triple layer foam molded for maximum sweat absorption
- Removable nose guard
- Outrigger at both sides
- 100 % UVA & UVB protection
- 2 pin tear off system

FIT

- TPU faceplate for extra comfort
- 360° venting design to maximize ventilation
- Ultra-wide 50 mm strap for perfect fit to your helmet

CERTIFIED

- EN1938:2010 standard

What's In The Box

- Pinlock Max Vision
- Nose Guard
- Carrying Bag
- Microfiber Lens Cleaning Cloth
- Laminated Tear off Kit (Aura Pro)
- Iridium Lens (Auro Pro)
- Clear visor (Auro Pro)

FEATURES

- Wide vertical (185mm arc-length) and horizontal (86mm arc-length) view area for best visibility.
- Anti-fog, abrasion and impact resistance Lexan lens with UVA & UVB protection.
- High quality triple layer foam, softer hypoallergenic for a better skin comfort and maximum sweat absorption.
- Extremely durable and elasticated 45 mm strap with non-slip silicone reinforcement.
- Ventilation holes around the frame for excellent airflow.
- Visors with nine pin retention system for maximum stability
- Over the glasses fit.
- Goggle attached to outrigger for a perfect fitting (CHARGER PRO)

FIT

- TPU faceplate for extra comfort
- Ventilation holes around the frame offer excellent airflow.
- Extremely durable and elasticated 45 mm strap with non-slip silicone reinforcement

APPAREL

MATERIALS

DUPONT ARAMID FIBER

Aramid fibers add strength, flexibility, and lightweight cut and abrasion resistance to modern fabrics. Despite being lightweight, they are heat and fire-resistant and up to five times stronger than steel. LS2 uses Aramid fiber to reinforce our jeans and casual pants.

CORDURA

Cordura is a DuPont-developed, abrasion-resistant nylon fabric with a dense weave and water-resistant treatment. Twice as durable as standard nylon and ten times more durable than cotton, it is available in various weights and thicknesses. Cordura's high durability and abrasion resistance make it ideal for military equipment worldwide.

OXFORD FABRIC 600D

This special material offers superior performance, high abrasion, and tear resistance in a lighter, more comfortable garment. Wrinkle-resistant Oxford polyester fibers retain shape and meet OEKO-TEX Standard 100 and EN17092 standards. LS2 softens the polyester fiber without compromising performance.

OXFORD FABRIC 450D

Our 450D Oxford fabric is a lighter version of our 600D, maintaining superior abrasion and tear resistance. Oxford polyester fibers are wrinkle-resistant, offer excellent shape retention, and have a soft, ultra-comfortable texture.

SUPERFABRIC

SuperFabric is a durable, flexible material with hard guard plates for extreme protection. Used in protective clothing, footwear, and gear, it offers excellent cut, puncture, and abrasion resistance, ideal for tough environments.

SPANDEX

Spandex is the leader in high stretch comfort fabrics. Made from polyurethane fiber, Spandex makes for a perfect, form-fitting, flexible material. Its unique composition allows this fabric to guarantee outstanding comfort and freedom of movement.

RIPSTOP

Ripstop fabric has reinforcing threads woven in a grid pattern throughout the material. This webbing adds strength, abrasion and tear resistance, making for an exceptionally durable garment, while maintaining a high level of comfort.

3 LAYER SOFTSHELL

Developed to improve comfort while maintaining a high level of water resistance, 3-layer softshell fabric is a modern marvel. Made of super elastic polyester, our 3-layer softshell combines unmatched strength with elastic properties for extraordinary levels of comfort and performance.

OXFORD DOBBY

Oxford Dobby Laminated fabric combines abrasion-resistant strength with waterproof and breathable materials, enhancing comfort and performance. It sets a new standard in quality, safety, and style for LS2 motorcycle apparel.

RUCO®-THERM CMB

RUCO®-THERM CMB is a thermal comfort finish that provides a dual effect. It features sensory cooling through a menthol derivative and long-lasting evaporative cooling with a moisture-responsive polymer that offers a depot effect for extended performance.

SIZE GUIDE

HOW TO MEASURE YOURSELF

- ① Body length
- ② Length from shoulder to waist
- ③ Waist circumference
- ④ Leg length

The LS2 logo is located in the top left corner. It consists of the letters 'LS2' in a white, italicized, sans-serif font, set against a solid red rectangular background.

LS2

The background of the entire page is a grayscale, heavily blurred photograph of a motorcycle. The motorcycle is positioned horizontally across the frame, with its headlight, handlebars, and front fairings visible. The background behind the motorcycle is a dark, textured surface, possibly a forest or a rocky hillside. The overall effect is one of motion and speed.
